Homework, ISTA-421

Chapter 20, C# Step by Step

Readings

Read chapter 20, pages 439 – 466 in the C# Step by Step book.

Discussion Questions

- 1. What is a delegate? Explain delegates in terms of pointers and reference types.
- 2. How do you declare a delegate? Include a discussion of types, return values, names, and parameters.
- 3. How do you create instances of delegates and assign values to the instance? What are the values?
- 4. How do you invoke a method that has been added to a delegate?
- 5. What is an *event*? Why do we have events?
- 6. How do you declare events?
- 7. How do delegates recognize event subscriptions? How do you unsubscribe an event from a delegate?
- 8. How do you raise an event? How do you declare code that raises an event?
- 9. Explain with specificity what happens when an event fires and that event has been attached to a delegate.
